# Device enrollment for Android devices

Prerequisites for enrolment

- Device OS should be updated to the latest version of Android: 13.0 or above

- Okta Verify application must be installed and configured as per the instructions provided.

- Devices should not be rooted/jail broken.

- Devices should not be enrolled with any other Mobile Device Management (MDM) solution. Follow the next steps to unenroll if your device is enrolled with any other MDM Solution.

- Configuration time will take around 20 minutes depending upon your WiFi connection.

Additional notes

Configure Zscaler Client Connector and sign in with MS Authenticator (You can install it from ME APP Catalog if not installed already and configure)

Click 'Allow' for Zscaler to create the VPN connection.

Additional notes

- It is mandatory to configure Work Profile Password / Pin .

- Virtusa Mandatory apps will be installed automatically. You can access the downloaded apps in your phone's work profile section.

- Configure Okta Verify app in Work Profile and remove Okta Verify app from personal profile if present.

- Zscaler must be authenticated using Microsoft Authenticator.

- Teams App configuration steps :

  o Configure the MS Authenticator app.

  o Open Teams application, click "**Get Started**".

  o Enter your Virtusa account credentials and configure.

In case of facing any issue while enrolling the device, then reach out to : **anytimeservicedesk@virtusa.com**.
