

# Microsoft Defender for Endpoint for iOS

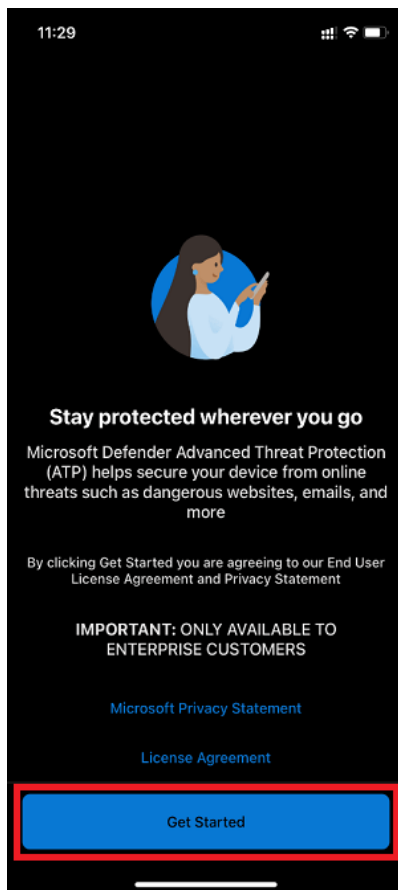

UserGuide

## Important Prerequisite

The Microsoft Defender for Endpoint app is mandatory and will be pushed to all Intune registered iOS devices. You will be prompted to install the app, or it is also available for download in the Apple App Store.

## How to setup Microsoft Defender for Endpoint once installed

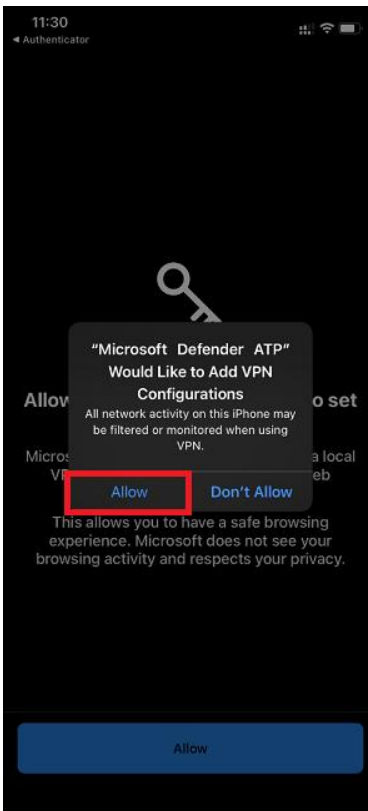

Step 1: Open the Microsoft Defender for Endpoint app and tap on 'Get Started'

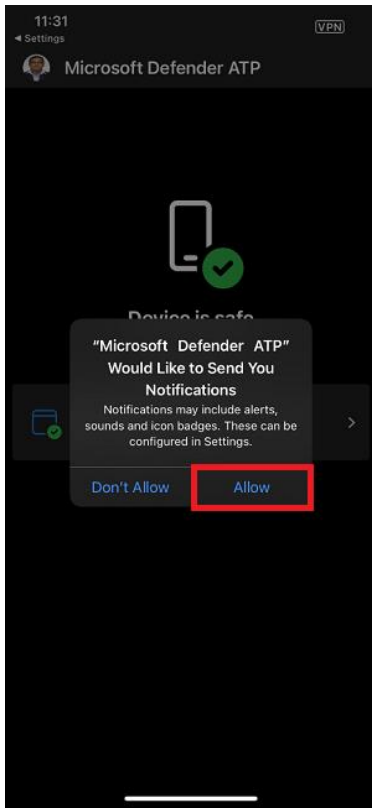

### Step 2: Tap on your Virtusa account

### Step 3: Tap on 'Allow'

Step 4: Tap on 'Allow'

Note: The installation is completed, and the device is safe
