# Goals and performance

[TCFD: Metrics and Targets]

## Environmental

Target	Base year	Target year	Target percentage	FY23 status
Short term				
Reduce energy consumption	2016	2022	40%	28%
Increase paper waste recycling to 90%	2020	2022	90%	100%
Achieve zero e-waste to landfill compliance	2020	2022	100%	100%
Medium term				
Reduce Scope 1 and Scope 2 (market-based) emissions (absolute target)	2018	2025	25%	42%*
Reduce Scope 1 and Scope 2 (market-based) emissions (intensity target)	2016	2030	40%	77%*
Obtain energy from renewable sources	2023	2040	100%	10%**
Reduce Scope 3 emissions from business travel	2018	2030	30%	54%*
Reduce per-employee water usage	2017	2035	40%	82%*
Long term				
Reduce Scope 1 and Scope 2 emissions	2018	2050	70%	N/A

## Social

Target	Base year	Target year	Target percentage	FY23 status
Short term				
Increase gender diversity in workforce	2021	2026	40%	32%
Increase gender diversity in hiring	2021	2026	55%	33%
Increase supplier diversity	2022	2026	58%	55%

### Notes:

- In January 2023, we committed to the Science Based Targets Initiative's (SBTi) Net Zero Standard and aim to align our current emissions reduction targets with the SBTi criteria in the next 24 months.
- \*Indicates targets that have steep reductions due to the work from home policies. As the GHG Protocol does not provide a mechanism to report on such emissions, we have not included it in our formal reporting, but we estimate emissions from remote work to be approximately 9,923.439 MTCO2.
- \*\* Indicates a revised target. In FY23 we updated our renewable energy target to obtain 100% renewable sources by 2040.
- N/A indicates not applicable, as a short- or medium-term target is in progress.

### Notes:

- Scope 1: In FY23, we expanded our Scope 1 reporting to include emissions from natural gas and refrigerants. This has contributed to the increase in Scope 1 emissions in FY23.
- Scope 3:
  - While our Scope 3 emissions from business travel reduced significantly in FY21 due to the COVID-19 lockdowns, due to travel restrictions being eased in FY22, emissions from business travel have increased.
  - In FY23, we expanded our Scope 3 reporting to include emissions from purchased goods and services, well-to-tank emissions from electric power, diesel, and natural gas; and expanded business travel to include rail travel and accommodation. As a result, our total Scope 3 emissions have significantly increased from last year. Purchased goods and services contributed to 52% of our total Scope 3 emissions.

Table: Breakdown of Scope 3 emissions (metric tons CO<sub>2</sub>e)

### Notes:

We have expanded reporting on Scope 3 categories as follows:

- Added emissions from capital goods in FY20.
- Added emissions from transmission and distribution losses in FY21.
- Added emissions from waste and upstream transportation and distribution in FY22.
- Added emissions from purchased goods and services in FY23. As a result, our total Scope 3 emissions have significantly increased from FY22 as this category contributes to 52% of our total Scope 3 emissions.
- Expanded fuel and energy related activities to include well-to-tank emissions from electric power, diesel, and natural gas in FY23.
- Expanded business travel to include rail travel and accomodation in FY23.

As a result, emissions data is not available for some years for these categories.

- Purchased goods and services
- Capital goods
- Fuel and energy related activities
- Upstream transportation and distribution
- Waste generated in operation
- Business travel
- Employee commuting

# Energy

Table: Direct and indirect energy consumption in Gigajoules (GJ)

Notes:

- Energy consumption of grid electricity and natural gas data has been estimated for sites that do not receive utility bills.
- The Navalur campus had been obtaining wind energy through a Power Purchase Agreement (PPA) since 2015 but the contract expired in March 2022.
- Electricity consumption has increased due to return to office in FY23.

# Water

Table: Water by source and water recycled (in thousand cubic meters (m³))

### Notes:

We are able to track water usage only at seven facilities, which account for 69% of our real estate, and recycling data is available only for the three campuses.

- In FY23, water consumed in areas of water stress amounted to 30.621 thousand cubic meters (m³) (84% of total water consumed).
- We started tracking water withdrawal by source only in FY20, so this breakdown is not available for previous years.
- There was a reduction in water used and water recycled due to the work-from-home policies followed in FY21 and FY22.
- Virtusa’s water withdrawal is equal to the total water consumption.

# Governance data

[GRI: 204-1, 205-2, 205-3, 406-1]

Our Code of Business Conduct and Ethics ("Code") actively encourages employees to report any suspected violations of our Code, company policies and procedures, as well as potential violations of the law. During our fiscal year ending March 31, 2023, Virtusa Corporation received a total of 22 reports from across the globe. Each of these reports went through a thorough investigation by the company.

In cases where the investigations determined merit in the complaints, Virtusa Corporation took appropriate corrective measures in accordance with its established policies and procedures. Among the 22 matters raised, 59% were submitted anonymously. The majority (55%) were resolved through the engagement of human resources or closed due to insufficient findings/facts to support them or a lack of response to requests for further information. In 41% of the cases, findings resulted in the termination of employees. Fiscal years 2021 and 2020 experienced lower reports, which may have been due to the pandemic.

The tables below provide details of the complaints received over the past four fiscal years:
