

Engineering the future of insurtech

AI-driven platforms. Scalable impact. Limitless possibilities.

Built for innovation. Engineered for scale.

Virtusa delivers future-ready solutions that empower insurtechs to innovate faster, reduce costs, and stay compliant, whether launching new products or modernizing legacy systems. We have partnered with global leaders like Pega, Google, and others to co-create cutting-edge insurance platforms.

These strategic alliances position Virtusa at the forefront of insurtech innovation, not as a follower, but as a force shaping the future.

Why Virtusa?

Domain-trained genAI frameworks

ClaimsBot, underwriting workbench, smart FNOL, and insurance-specific AI models to reduce development time and improve decision accuracy.

Human-centered experience design

Design thinking and experience-led transformation to unify customer, agent, broker journeys.

Rapid co-creation and scalability

Tools, talent, and agile processes to co-create, iterate, and scale MVPs and digital products efficiently.

Global delivery with BOT models

Nearshore/offshore engineering hubs and build-operate-transfer (BOT) models for scalable, stage-specific delivery.

Our core capabilities

AI at the core

Embed AI/ML, GenAI, and real-time analytics to automate workflows, improve decisions, and drive faster outcomes.

Design to market adoption

Build AI-native platforms with the right tech stack and connect with enterprise buyers to speed up adoption.

Accelerators for rapid innovation and platform modernization

Harness our proprietary tools, cloud-native architecture, and low-code platforms to modernize systems and reduce time to market.

Scalable global engineering and agile delivery

Deploy agile pods and global delivery hubs to execute faster and scale efficiently.

End to end engineering enablement and cloud acceleration

Move from strategy to deployment with cloud-native frameworks and toolkits that boost agility and speed.

Solutions tailored for insurtech

Built on modular, innovation-first architectures, Virtusa's offerings support insurtech organizations in launching, scaling, and optimizing digital platforms with accuracy and speed.

01

Co-innovation lab

A dedicated space for joint development, prototyping, and testing of insurtech solutions

02

Smart automation

AI and process mining streamline workflows and reduce manual effort

03

RegTech integrations

Embedded compliance modules and real-time risk analytics support regulatory alignment

04

Composable APIs

Insurance-specific APIs simplify integration and cut down development cycles

05

Cloud migration toolkit

Tools and accelerators that simplify and secure cloud transitions
