

# Continue business agility, productivity, and improved engagement with Pega Evergreen Infinity

In the current world of economic disruption, organizations face challenges with cutting costs while innovating to meet industry and customer needs. Business outcomes can come in faster if there is an easy and seamless connection between the customers, stakeholders, and employees.

Pega Evergreen Infinity services unify customer engagement and automation to help organizations become more self-optimizing. It empowers organizations with AI-powered decisioning and workflow automation, helping them unlock new levels of intelligence, agility, and productivity.

We at Virtusa believe that Pega modernization is about consistently adopting new product features, deprecated product capabilities replaced with modern standards, a commitment eliminate technical debt continually, and leveraging DevOps and test automation.

# How Virtusa can help?

Virtusa, with its engineering DNA, innovative solutions, and partnerships, has innovated digital transformations across industry value chains. With the suitable methodology and tools combined with our exhaustive experience, we have delivered values due to:

## Exceptional Pega competency

We are among the world's oldest and largest Pega competencies, with deep intimacy with the technology. We have received dozens of awards from Pega and high-ranking analyst recognition.

## Prefabricated assets

The recon process (from Virtusa's Triple R) blends deep Pega knowledge and specialized tooling to create a pathway for Pega cloud migration and modernization.

## Differentiating discipline

Through app health assessment, business case/ROI, migration blueprint/cookbook, foundational architecture, refactoring backlog, and implementation of modernized capabilities.

## Award-winning specialization

We were awarded the 2022 Modernization Partner of the Year from Pegasystems, one of only three authorized modernization specialists, and the most seasoned and experienced upgrade/modernization partner in the Pega ecosystems.

# Capabilities

Virtusa is the Number 1 modernization transformation partner to Pegasystems, with the most profound experience in the most advanced tooling.

## Pega Evergreen Infinity - the main ingredients

Continued innovation through modernization

Consistent adoption of new product capabilities

Maintaining GA release of Pega Infinity

Commitment to continually eliminate technical debt

Leveraging DevOps and automated testing

**Virtusa keeps Pega Evergreen Infinity with continuous modernization rigor.**
