

ServiceNow governance, risk, and compliance (GRC) experience

Gain real-time visibility into risk and governance across the enterprise

Businesses face numerous challenges in their digital journey, with risk and compliance being one of the most critical aspects. The distribution of organizations across various locations and hybrid workplace environments demands a stringent risk and compliance framework. However, this leads to uncontrolled operations and governance, limited visibility, increased costs, and risk exposure.

Virtusa's governance, risk, and compliance (GRC) experience powered by ServiceNow offers full-stack risk and compliance management across organizations. It is an automated, actionable, unified governance, risk management, and compliance solution. The solution controls risk exposure and carves out more time through automation for proactive activities and higher-value tasks.

Why Virtusa

- Being a strategic partner of ServiceNow, we have delivered projects across the world
- We drive client revenues with our repeatable processes and accelerators by leveraging the ServiceNow GRC solution
- We offer complete coverage on solution development through engineering, innovation, and dependable delivery

Delivering corporate-grade risk and compliance management through building blocks such as:

-  Risk and compliance analysis
-  Auto remediation and risk automation
-  Workflow automation
-  360° view of governance and risk automation

Virtusa and ServiceNow can help:

-  Improve decisions and performance
-  Gain real-time visibility into risk across the organization
-  Increase productivity and reduce costs
-  Effectively communicate with stakeholders across the organization
-  Ensure organizations with stability and growth
