DATA SHEET

Cloud Managed Services

Enterprises often do not focus on building the right skills, tools, and processes to support their cloud transformation journey and end up with diminishing returns on their cloud ROI. A trusted managed services partner can eliminate these barriers, enabling you to maximize business value while taking care of the overheads of day-to-day operations, monitoring, and management of the cloud.

Trust Virtusa to help you run your cloud better. We are a next-gen Managed Services Provider (MSP) that helps design, migrate, run, and optimize your cloud environments, including data, infrastructure, and applications. We provide end-to-end managed cloud services, cloud operations design, proven target operating models, and best-of-breed tools for security and cost optimization.

Why Clients are Choosing Virtusa

Virtusa's Cloud Operating Model follows a service-based approach to design, build, and operate workloads in the cloud.

- **Service-based operating model:** ITIL service management with a robust catalog of subscription-based services
- **Continuous improvement services:** A proven approach to optimize the operational steady state from reactive to predictive with a focus on financial management, cost optimization, and performance

- **Governance:** Clearly defined zero-touch delivery governance with committed Service Level Agreements (SLAs) and Key Performance Indicators (KPI) tied to business impact severity
- **Cloud command centers:** State of the art facilities that are strategically located to provide 24x7x365 coverage for clients

Managed Service Capabilities

We offer provisioning, operations, monitoring, security, performance management, and support. In addition, we also help you focus on the sustenance of private, public, and hybrid infrastructure with flexibility and scale, enabling superior management of cloud environments. Our support team operates round-the-clock for enhanced availability, resiliency, performance, security, and cost optimization.
Our focus areas include:

- Cloud monitoring and support
- Configuration management
- Automation / DevOps
- Identity management
- Security
- Cost optimization
- Backup and disaster recovery
- Hybrid and multi-cloud
