

# Track your employee vaccination with Virtusa Vax Manager

According to the Department of Labor's Occupational Safety and Health Administration (OSHA) mandate, employers with 100 or more employees need to ensure that every worker is fully vaccinated or tested for COVID-19 weekly. Businesses globally face the challenge of adhering to government mandates and tracking employee vaccination status. They also need to maintain a record of vaccination proof, exception information, employee health assessment and return to office assessment.

Virtusa Vax Manager, powered by Pega technology, provides businesses with an easy way to track employee vaccination status. The tool offers all the capabilities needed to streamline the tracking process, reducing time to comply with company, state, or federal mandates.

# Ensure easy vaccination management and safe return to office

The tool is lightweight, tracks and helps obtain employee vaccination information, and can be deployed to any organization. It helps companies stay compliant with emerging regulations while easing the burden on HR staff.

**Vaccine tracking** captures employee vaccination details with an option to upload their vaccine card

**Vaccine exception detail** captures employee vaccination exception details with an option to upload supporting documentation

**Return to office questionnaire** captures health status information and return to office questionnaire details of employees

**Reports** for operational, executive, and federal requirements

**Employee health assessment** evaluates employee health status using prebuilt questionnaires, arranging work from home by providing necessary resources
